

Diesel & Petrol Air Intake & EGR Cleaner 500ml

JLM Diesel Air Intake & EGR Cleaner removes stubborn dirt including rust deposits from the air intake and exhaust gas recirculation system!

In diesel engines, fouling as a result of soot accumulation and depositing occurs as a result of driving at low revs, Eco driving or from making short journeys. If fouling occurs anywhere in the diesel engine, the dirt quickly spreads through the entire intake system, as a result of which the engine starts to run irregularly and eventually it even cuts out. This dirt does not go away of its own accord or from regular motorway driving. The intake system must therefore be cleaned.

JLM Diesel Air Intake & EGR Cleaner is a powerful and effective cleaner that cleans the valve on the exhaust gas recirculation system, the complete intake system and the intake valves in the cylinder head. Diesel Air Intake & EGR Cleaner restores the air supply to the engine. This improves engine power and acceleration and reduces the amount of smoke from the exhaust. Use Diesel Air Intake & EGR Cleaner if the engine idles irregularly or cuts out spontaneously.

Benefits

- Effective cleaner exhaust gas recirculation system (EGR)
- Dissolves rust, dirt and (soot) deposits
- Optimizes the air supply to the engine
- Improves power and acceleration
- Stops irregular idling

How to use:

Start driving, bring engine to operating temperature and switch off engine. Remove the hose between the turbo and the air filter. Start the engine and run it at about 2,000 rpm. Spray about half an aerosol can of JLM Diesel Air Intake & EGR Cleaner from a distance of about 20 centimeters several times directly into the intake manifold (Spray the product at short intervals of 1 to 2 seconds) into the air intake manifold until the engine starts running smoother. Fit the hose between the turbo and the air filter to allow the engine management system to reset itself. Drive about one kilometer to remove all soot deposits. Product information

Art. Nr: J02710

Barcode: 8718274350050

HS code: 38140090

Ufi Code: QPG7-60XY-4005-AWPF

Pack Size : 500ml

Quantity in box: 12

Weight full box: 8.3 kg

Boiling point: -44.5°C

Flash point: -97C

Density at 20 °C: 0.745 g/cm³

Colour: According to product specification

Odour: Characteristic
